20999	7590	11/02/2005	EXAMINER HAN, QI	
FROMMER LAWRENCE & HAUG 745 FIFTH AVENUE- 10TH FL. NEW YORK, NY 10151			ART UNIT 2654	PAPER NUMBER

DATE MAILED: 11/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/674,576	Applicant(s) SUDO ET AL.	
	Examiner Qi Han	Art Unit 2654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2,3,6,7,9,11 and 23-34 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2,3,6,7,9,11 and 23-34 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Amendment

2. This communication is responsive to the applicant's amendment dated 08/11/2005.

Applicant amended claims 2-3, 7, 11, 23-29 and 32 (see amendment: pages 2-8),:

The examiner withdraws the rejection regarding claims 2-3 under 35 USC 112 2nd, because the applicant amended the claims (see the amendment: page 2).

Response to Arguments

3. Applicant's arguments with respect to rejection of claims 2,3,6,7,9,11 and 23-34 under 35 USC 103(b) have been considered but are moot in view of the new ground(s) of rejection, since all amended independent claims introduce new issue(s) (see detail in the claim rejection below).

In response to the applicant's arguments regarding the amended independent claim 23 (amendment: page 10-13)(also applied to claims 25-27), the examiner has a different view of the prior art teachings and the claim interpretations. As general, it is noted that even though the amended limitation(s) introduces new issue and changes the scope of the claim, the prior art can still cover a proper ground of the claim rejection by a reasonable interpretation of the claimed limitations (see detail in the claim rejection below). Further, it is appears that the applicant is trying to say that Hedin (prior art) can only use voice command, but not use a keyword for

Art Unit: 2654

searching (amendment: page 12). It should be pointed out that the claimed limitation ~~is~~ neither specifically includes the argued terms “a keyword for searching”, nor particularly distinguish between using voice command and a keyword for searching. It is also noted that voice command can use keyword for searching in the art, they are not exclusive each other. Finally, it is noted that Hedin teaches that his system not only is able to recognize isolated words (keywords), but also have the capability of recognizing continuous speech (col. 9, lines 36-55), and using navigation and content variable (col. 12, lines 35 and 60), which suggest that Hedin’s system is capable of implementing the functionality as claimed.

Claim Rejections - 35 USC § 102

4. Claims 2-3, 9, 11, 23, 25-27, 30 and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Hedin et al. (US 6,185,535) hereinafter referenced as Hedin.

As per **claim 23**, Hedin discloses voice control of a user interface to service applications (title), comprising:

“a portable terminal configured to transmit input speech information to a server over a network” (Fig. 1a and column 4 line 44 to column 5 line 33, ‘client part 101’, ‘server part 103’, ‘wireless mobile terminals (portable terminal)’, and ‘advanced mobile network’; Fig. 3 and column 2, lines 59-60, ‘the unrecognized portion of the audio input signal (input speech information) is formatted in a data unit that is communicated (transmitted) to a remote application part (server part)’);

“a server configured to receive the transmitted input speech information from said portable terminal, and to generate a contents list in response to input speech information”, (Fig. 3

Art Unit: 2654

and column 6 lines 20-39, 'remote application part (RAP) 205(server) , 'external services and content (ESC) 207'; column 8 line 56 to column 9 line 57, 'speech recognition', 'provide (generate) information and content over the Internet'; column 10, line 30 to column 11 line 40, 'complete menu (corresponding to a contents list)'; column 14, lines 10-20, 'the service might first present the user with a list of options (contents list)...').

"wherein a first contents list is generated by calculating the similarity of acoustic characteristic quantities between first input speech information and preparation information of at least one category of content corresponding to the first speech information of each content, said server transmits input request information related to a category of content that is selected based on the result of calculating the variations of speech information of each category of content included in the first contents list", (column 14, lines 10-60, 'using' the speech input 'show weather for' (first input speech information) in 'a speech recognition enabled terminal', 'a weather information (interpreted as preparation information of at least one category of content) service might first present the user with a list of options (contents list)...', 'cities (can also be interpreted as preparation information of at least one category of content)'; Fig. 3 and column 9, line 25 to column 11 line 41, 'to perform speech recognition, the RAP's exemplary ASR 307 includes the feature vector (read on acoustic characteristic quantities) extraction unit 309, a feature matching (read on calculating the similarity) and decision unit 311 and RAP reference database 313', 'in addition to being able to recognize isolated words, the RAP's ASR 307 may also have capability of recognizing (calculating similarity of acoustic characteristic quantities) continuous speech'),

Art Unit: 2654

“and if second input speech information is received, then the selected category of content included in the first contents list is used when calculating similarity”, (column 15, lines 5-16, ‘the user then speaks the city name (second input information)...for speech recognition and further processing (calculating similarity)’, wherein ‘the city options’ corresponds to the selected category included in the first contents list).

As per **claim 2** (depending on claim 23), Hedin further discloses “said portable terminal includes speech recognition means for performing speech recognition on said input speech information”, (column 4, line 66 to column 5, line 11, ‘the client (terminal) part 101 includes a simple ASR (automatic speech recognition)’, ‘a menu item’, ‘recognizing a small number isolated words (read on input speech information)’, ‘wireless mobile (portable) terminals’).

As per **claim 3** (depending on claim 23), Hedin further discloses “said server includes speech recognition means for performing speech recognition on said input speech information received from said portable terminal over the network, (column 9 lines 1-67, ‘an ASR 307 that will recognize the TP audio encoded words’, ‘able to recognize isolated words, ... may also have capability of recognizing continuous speech’ that includes input speech information).

As per **claim 25**, it recites a portable terminal for a content selection system. The rejection is based on the same reason described for claim 23, because claim 25 recites the same or similar limitation(s) as claim 23.

As per **claim 9** (depending on claim 25), the rejection is based on the same reason described for claim 2, because claim 9 recites the same or similar limitation(s) as claim 2.

As per **claim 26**, it recites a server for a content selection system. The rejection is based on the same reason described for claim 23, because claim 26 recites the same or similar limitation(s) as claim 23.

As per **claim 11** (depending on claim 26), the rejection is based on the same reason described for claim 3, because claim 11 recites the same or similar limitation(s) as claim 3.

As per **claim 27**, it recites a content selection method. The rejection is based on the same reason described for claim 23, because claim 27 recites the same or similar limitation(s) as claim 23.

As per **claim 30** (depending on claim 23), Hedin further discloses “said server requests the input speech information associated with a specified category”, (Fig. 3 and column 15, lines 55-56, ‘interactive voice controlled services’; column 15, lines 10-11, ‘device says: “Enter city name” (requested input speech information associated with a category of city)’).

As per **claim 33** (depending on claim 26), the rejection is based on the same reason described for claim 30, because the claim recites the same or similar limitation(s) as claim 30.

Claim Rejections - 35 USC § 103

5. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hedin in view of Ladd et al. (US 6,493,671) hereinafter referenced as Ladd.

As per **claim 6** (depending on claim 2), Hedin does not expressly disclose a verifying mechanism for speech recognition as the claimed “said speech recognition means includes means for verifying whether or not the speech recognition on said input speech information has been made correctly, such that if the speech recognition is verified by said verification means to be

Art Unit: 2654

made correctly, then said input speech information, processed with the speech recognition means, is output, and if the speech recognition is verified by said verification means not to be made correctly, then speech recognition to output the speech information processed with said speech recognition means.” However, this feature is well known in the art as evidenced by Ladd who discloses a markup language for interactive service to notify a user of an event and methods thereof, comprising a voice browser 250 (Fig. 3) (column 7, line 6) and an automatic speech recognition (ASR) unit 254, 12-37), and the “DIALOG” element and the associated “STEP” element of a markup language define a dialogue interpretation between the voice browser and user, including “confirm” element (column 18, lines 1-39) for allowing user verifying the spoken content. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hedin by specifically providing a verifying mechanism for speech recognition, as taught by Ladd, for the purpose of increasing speech recognition accuracy.

As per **claim 7** (depending on claim 3), the rejection is based on the same reason described for claim 6, because claim 7 recites the same or similar limitation(s) as claim 6.

6. Claims 24, 28, 31 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hedin in view of Milsted et al. (US 6,263,313 B1), hereinafter referenced as Milsted.

As per **claim 24** (depending on claim 23), Hedin fails to expressly disclose that “the contents selection information includes categories for title, performer, and genre”. However, this feature is well known in the art as evidenced by Milsted who discloses method and apparatus to create encoded digital content (title), comprising determining the genre of the music selected (column 66, lines 53-54) and a simple browser interface with list of titles, performers or new

Art Unit: 2654

releases to select from (column 74, lines 39-41). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hedin by specifically providing categories for title, performer, and genre, as taught by Milsted, for the purpose of increasing flexibility of selecting contents.

As per **claim 28** (depending on claim 27), the rejection is based on the same reason described for claim 24, because the claim recites the same or similar limitation(s) as claim 24.

As per **claim 31** (depending on claim 30), the rejection is based on the same reason described for claim 24, because the claim recites the same or similar limitation(s) as claim 24.

As per **claim 34** (depending on claim 33), the rejection is based on the same reason described for claim 24, because the claim recites the same or similar limitation(s) as claim 24.

7. Claims 29 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hedin in view of Ranger (US 5,999,940).

As per **claim 29** (depending on claim 23), Hedin does not expressly disclose that “said server sends the contents list to said portable terminal if the contents list is determined using thresholds”. However, this feature is well known in the art as evidenced by Ranger who discloses interactive information discovery tool and methodology (title), and teaches that ‘web server ...performs a hit analysis of the query result’ and ‘a predefined threshold parameter ‘N’ indicates how many contents items must be present in order to trigger the automatic content analysis (column 19, lines 40-52, and Fig. 7 block 700). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hedin by specifically providing a predefined threshold parameter for the query result of the contents, as taught by

Art Unit: 2654.

Ranger, for the purpose of triggering the automatic content analysis (Ranger: column 19, lines 51-52).

As per **claim 32** (depending on claim 26), the rejection is based on the same reason described for claim 29, because the claim recites the same or similar limitation(s) as claim 29.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. Please address mail to be delivered by the United States Postal Service (USPS) as follows:

Mail Stop ____
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

or faxed to:

(703) 872-9306, (for formal communications intended for entry)

Or:

Art Unit: 2654

(703) 872-9306, (for informal or draft communications, and please label "PROPOSED" or "DRAFT")

If no Mail Stop is indicated below, the line beginning Mail Stop should be omitted from the address.

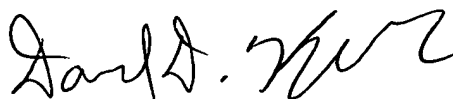

Effective January 14, 2005, except correspondence for Maintenance Fee payments, Deposit Account Replenishments (see 1.25(c)(4)), and Licensing and Review (see 37 CFR 5.1(c) and 5.2(c)), please address correspondence to be delivered by other delivery services (Federal Express (Fed Ex), UPS, DHL, Laser, Action, Purolator, etc.) as follows:

U.S. Patent and Trademark Office
Customer Window, Mail Stop _____
Randolph Building
Alexandria , VA 22314

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Qi Han whose telephone numbers is (703) 305-5631. The examiner can normally be reached on Monday through Thursday from 9:00 a.m. to 7:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil, can be reached on (703) 305-9645.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Inquiries regarding the status of submissions relating to an application or questions on the Private PAIR system should be directed to the Electronic Business Center (EBC) at 866-217-9197 (toll-free) or 703-305-3028 between the hours of 6 a.m. and midnight Monday through Friday EST, or by e-mail at: ebc@uspto.gov. For general information about the PAIR system, see <http://pair-direct.uspto.gov>.
